Woven through the ages

A quality for tomorrow's stages

MISSION:

This days the art which be concept and practical it has more fans , carpet is a conceptual and practical art .

By discovering Pazyrik carpet which its case history is imputed to the lands of ancient Iran we can dauntlessly call this practical art an Iranian work .

Considering that our mission at Almas Ris Aria Textile as an Iranian is to preserve the values , history and civilization of our land , it prompted us to create the value chain of Iranian carpets in the production and commercial complex of Almas Ris Aria Textile so that we can according needs of world offer this Iranian art to the whole world with high quality and reasonable price and in sync with modern changes.

In this regard, the comfort, welfare and health of the consumer is the priority of Almas Ris Aria Textile Company

Therefore, we added a high - quality BCF yarn production line to produce carpets and rugs to our production lines, and completed the Iranian carpet production chain in the Almas Ris Aria Textile Company

The BCF yarn production company under the Almas Ris Aria Textile brand was launched in 2017, and because we believe in creating jobs and helping the growth of our fellow men, and we consider it a great social responsibility, so this production complex with 17000 square meters of infrastructure was built in one of the deprived areas Isfahan.

CREATING QUALITY CONSISTENTLY:

Creating a safe, friendly and happy atmosphere is one of our management methods in Almas Ris Aria Textile, and this has caused a sense of gratification for the personnel and the satisfaction of the middle and senior managers of this company.

Such a friendly and satisfying atmosphere; It has caused high quality production and also commitment to customers, and on the other hand, it has brought loyal and satisfied customers to the company.

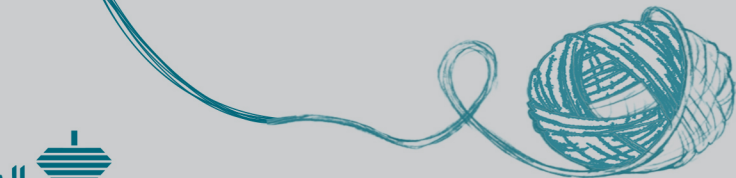

NURTURING RELATIONSHIPS :

Quality control and its constant consideration from the beginning until now, innovation according to the day needs of the market , after-sales service and creating friendly relations with colleagues, competitors and customers all over the world have been and are important values of Almas Ris Aria Textile company .

At Almas Ris Aria Textile Company, we consider our competitors as our colleagues , because we believe that healthy and friendly relations with colleagues will lead to our further growth , and based on this belief and using our many years of experience , we do not hesitate to help and serve our colleagues .

Therefore, if our colleague and customer has a defect or question in their carpet production line, we know it our duty to provide them with our research and technical team of Almas Ris Aria Textile for investigating and fixing the defect.

DEVELOPMENT:

We have removed the middlemen in Almas Ris Aria Textile by creating a value chain, and this has resulted in maintaining the high quality of the product at a reasonable price, and we have created a sustainable competitive advantage by maintaining the high quality.

STRENGTHENING MANAGEMENT AND ABILITY:

One of the remarkable points in the Almas Ris Aria Textile company is the growth of human resources and meritocracy , therefore regardless of gender and according to the competence of individuals, managers, both women and men, are selected and appointed in different departments.

WHY BCF YARN?

1) Strength and Durability:

Due to its fibrous structure, BCF yarn has a high resistance to wear and tear, so carpets produced with this yarn can be used in high-traffic areas. such as living rooms, reception rooms, dining rooms, bedrooms, hotel lobbies, commercial offices, etc, as well as spaces such as under the dining table, breakfast table, study table, library, etc.

2) Dyeability:

This yarn dyes well and has the ability to diversity colors. It creates vivid and stable colors and, like hand-woven carpets, it does not need to be used for several years to glitter and vivid the color.

It also has the possibility of creating variety in designs and the ability to weave kilim and carpets with the desired design and customer needs.

3) Resistance to pollution:

Due to its special structure, this type of yarn has a good resistance to pollution, stains, and moisture, and if stains are caused by coffee, tea, etc., you can remove them by simple washing.

Also, due to the use of heat set machin in Almas Ris Aria Textile company on the produced yarn, the carpet woven with this yarn has the property of not spreading fuzz , which is a suitable and safe option for use in children's rooms or spaces where people with allergies and asthma live.

4) Elasticity:

Due to the property of restoring the elasticity of the yarn, it helps the carpet and kilim woven with

Almas Ris Aria Textile yarn to return to its original shape after pressure and repeated use.

It also makes a soft and smooth carpet without annoying roughness.

THE BEST

5) Superiority over polyester and acrylic yarn:

Polypropylene yarns have a more reasonable price than other yarns. There is more thickness and strength in the carpet produced from this yarn.

Compared to the thickness, the weight of the carpet is lightweight. They have much less fuzz spreading and this is very effective in the health and sense of security for the consumer, especially people who have allergic diseases, and it's pet friendly carpet. With this yarn, you can weave a special carpet for a special class of society with a special taste.

Carpet woven with this yarn is easy to clean, with most spills washable using only water.

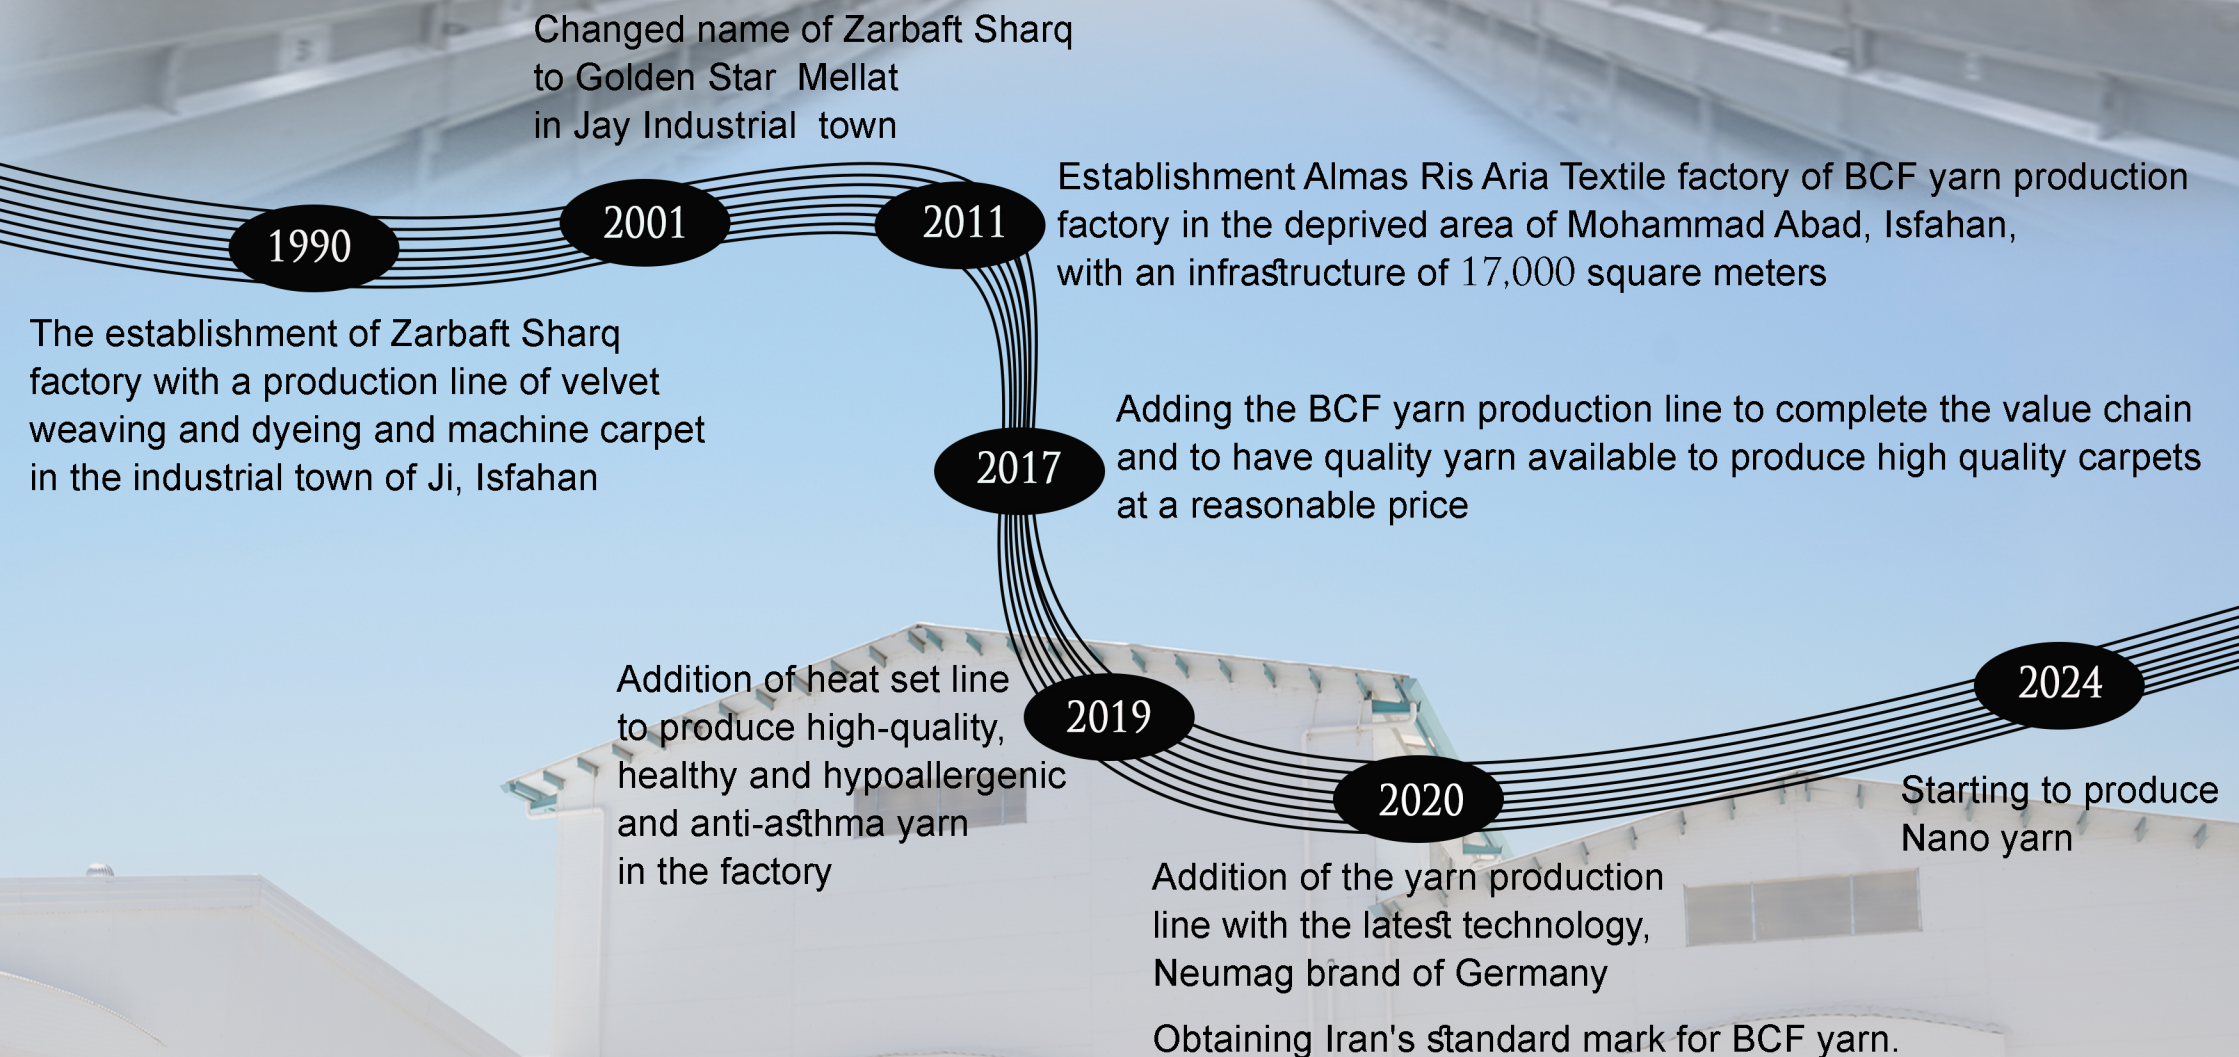

Yarns of Almas Ris Aria Textile company have UV, which makes them resistant to ultraviolet light and has color stability.

It has higher thermal resistance than carpets produced with other yarns.

Because the yarn produced by Almas Ris Aria Textile have pure and suitable oil, so after the carpet is woven, the carpet is soft and comfortable.

THE JOURNEY OF OUR PROGRESS:

BUSINESS AT A GLANCE:

Almas Ris Aria Textile factory has the ability to produce BCF yarn with 1100 to 2500 denier in a volume of 11 tons per day with high quality and custom colors.

Also it has heat-set yarn production technology and twist Yarn in 100 per 1 meter of yarn

If you need Nano-quality thread, you can safely order from us, because this possibility is available at Almas Ris Aria Textile factory.

In addition, due to the ability and capacity of the advanced devices in the factory, it is possible to produce colored yarn with UV capability.

In order to know about the quality of Almas Ris Aria Textile yarn, the specification of 1250 denier yarn, which has been approved by the standard, is given in the table opposite.

Specifications of BCF yarn of Almas Ris Aria Textile company with 1250 denier

| Test description feature | Acceptable limits | the result |
|--|---------------------------|---------------|
| genus | Polypropylene | Polypropylene |
| Denier | declared $\pm 3\%$ | 1250 |
| Percentage coefficient of variation yarn denier (CV%) | Maximum 2 | 2 |
| Yarn resistance to tear | Minimum 19 | 22 |
| The percentage of relative increase in thread length to the point of tearing | 30-80 | 33.77 |
| Filament | equal to the stated value | 144 |
| The amount of twist per meter of yarn | declared $\pm 10\%$ | 100 |
| Return to the initial swing | 0 | 0 |

CAPACITY STRENGTHENING:

Yarn production in Almas Ris Aria Textile Company volume:
